Correction to: PML: Regulation and multifaceted function beyond tumor suppression

Kuo-Sheng Hsu^{1,3} and Hung-Ying Kao^{1,2*}

Correction to: *Cell Biosci* (2018) 8:5

<https://doi.org/10.1186/s13578-018-0204-8>

In the publication of this article [1], there is an error in Table 3. The position of the black arrow and the terms CBP, Cdk1/2 and STAT3 of Table 3 were placed incorrectly in the online version while these were placed correctly in the PDF.

The error:

•6. PML→HIPK2→P53→apoptosis [68, 91, 92];
CBP

Should instead read:

•6. PML→HIPK2→P53→apoptosis [68, 91, 92];
CBP

CBP is placed below HIPK2 and points P53.

The error:

•2. Hypoxia→Cul3-KLHL20-|PML-|HIF1→angiogenesis [58];
Cdk1/2

Should instead read:

•2. Hypoxia→Cul3-KLHL20-|PML-|HIF1→angiogenesis [58];
Cdk1/2

Cdk2 is placed below Cul3-KLHL20. Hypoxia points Cdk2 and Cdk2 inhibits PML.

The error:

•6. IFN→PML→STAT1-|angiogenesis [110];
STAT3

Should instead read:

•6. IFN→PML→STAT1-|angiogenesis [110];
STAT3

STAT3 is placed below STAT1. PML inhibits STAT3 and STAT3 points angiogenesis.

This has now been updated in the original article [1].
